Summary

DevOps and Infrastructure Engineer with 20+ years in IT and 10+ years in automation and cloud. Specialized in AWS, Azure, Kubernetes, and CI/CD optimizations. Led cloud migrations, secured large-scale environments, and improved delivery pipelines.

Skills

- **Cloud**: AWS (12+ yrs), Azure (5+ yrs), GCP (2+ yrs)
- **Automation**: Terraform, Ansible, Helm
- **Containers**: Kubernetes (AKS, EKS, GKE, On-Prem), Docker, Podman, LXC/LXD
- **Databases**: PostgreSQL, MongoDB, Redis, MySQL
- **Messaging**: Kafka, RabbitMQ, NATS
- **CI/CD**: GitLab, Azure DevOps, Jenkins, GitHub Actions
- **Monitoring**: Datadog, Prometheus, Grafana, InfluxDB
- **Other**: Linux, Proxmox, VMware, Bash, Python

Experience

Solution Architect | 2bcloud

Aug 2024 – Present
– Migrated high-load systems AWS → Azure; developed LLDs, POCs, secured reviews.
– Built infrastructure with Terraform, Azure DevOps.

Senior DevOps Engineer | FILO Systems

Aug 2023 – Aug 2024
– Optimized GitLab pipelines; improved build speed.
– Implemented benchmarking across AWS, GCP, on-prem.

Senior DevOps Engineer | C2i Genomics

Feb 2022 – Jul 2023
– Refactored Azure DevOps pipelines; accelerated deployment cycles.
– Enhanced S3 cross-region transfer for 30PB datasets; secured AWS access across 30+ accounts.

System Engineer Level 3 | EPAM Systems

Mar 2019 – Feb 2022
– Improved monitoring (CloudWatch, Splunk, Datadog); reduced costs.
– Built production AKS clusters, enhanced GitLab CI/CD.

Head of DevOps | WalletFactory

Mar 2018 – Jul 2019
– Introduced IaC (Terraform, Ansible); migrated infrastructure to AWS.
– Deployed TICK-stack monitoring and created 24/7 on-call team.

Senior System Administrator | Oracle

Jul 2015 – Dec 2017
– Automated configuration (Puppet); streamlined release processes.

Education

- Master's Degree in Computer Science (2020)
- AWS Solution Architect Associate (2020)
- Certified Technical Interviewer (2019)
